THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL).

ESTABLISHED 1902.

INDEX TO VOLUME XLVI.

January to June, 1932.

Head Office:
49, Wellington Street, London, W.C.2.

XUM

Index to Volume XLVI.

SUBJECT INDEX.

A

Aachen Technical High School, 343.
Agricultural Engineering in 1931, 34.
Aluminium Alloys, Sand-Cast, 172.
Aluminium Competition, International, 263.
Aluminium Founding, Recent Developments in, 31.
American Foundry Industry, Recent Developments and Business Condition in, 25.
Annealing Furnace for Malleable Iron, 339.
Apprentice, Foundry, 236.
Austenite⟷Pearlite: Inversion, 341.
Austenitic Cast Irons, 325.
Automobile Foundry Industry, Recent Developments in, 24.

B

Babbitting Steel Shell Bearings, 329.
Belgian Foundry Industry in 1931, 37.
Blast Furnace, Modern, 145, 177.
Blow-holes and Porosity in Non-Ferrous Castings, 229.
Brass Foundry, Materials Handling in, 289.
Brinell Hardness and Tensile Strength of Cast Iron, 328.
British Industries Fair, 127.

C

Carbide Precipitation Hardening, Improvement of Steel by, 208.
Castings Costs, Data Required for Intelligent Examination of, 165.
Castings, Production of Ferrous and Non-Ferrous, 176.
Castings, Testing of, 154, 205.
Castings, Testing of Iron, 233.
Cast Iron, Brinell Hardness and Tensile Strength of, 328.
Cast Iron, Effect of Various Elements on the Quasi-isotropric State and Sensitiveness to Section Thickness of, 147.
Cast Iron from Ore to Mould, 44.
Cast Iron, Heat-Resisting, 88.
Cast Iron, Nickeliferous, 235.
Cast Iron, Nitrogen Hardening of, 279.
Cast-Iron Testing, Modern Practice in, 173, 187.
Cast Iron, Wear of, 216.
Cast Irons with Higher Nickel Additions, 193, 217.
Cast Steel at High Temperatures, Strength of, 307.
Centrifugally-Cast-Iron Rings, 242.
Chrome-Iron Alloys, Manufacture of, 101.
Chromium Plating, 135.
Chromium Steels, Heat-Resisting, 192.
Coal-Dust Experiments, 91.
Consumer a Supplier, 399.
Converter Practice, Modern, 219.
Copper Situation, 290.
Core-Shop Tool, Novel, 141.
Correspondence:—
American Appreciation, 80.
An Old-Established Iron Foundry, 288.
Census of Production, 126.
Chilled Cast-Iron Car Wheels, 378, 394.
Diesel Engine Pistons, 318.
Educational Schemes in Foundry Practice, 394.
Elektron Metal, 230.
German Foundry Educational Facilities, 378.
High-Frequency Furnace, 80.
"How Long?"—At Last, 362.
More Customs of the Trade, 46, 66.
Mould Stoves, 283.
Paper "Wangle," 80, 100, 110, 126.
Permanent Moulds for Rice Bowls, 81.
"Price Per Cwt.," 140.
Refractories for Rotary Furnaces, 283.
Rolls and Cupola Melting, 46.
Sand Testing and Economy, 126.
Shape of the Tensile Test-Bar for Cast Iron, 334.
Soda Ash and Soda Removal, 334, 349.
Soda Ash and Sulphur Reduction, 288.
Steel-Castings Production, 66.
Tank Plates, 318.
Wiltshire Brass Hardware, 318, 334.
Corrosion of Iron and Steel, 209.
Costs, Data Required for Intelligent Estimation of Castings, 165.
Couplings in Foundries, Use of Flexible, 103.
Crisis from the French Angle, Economic, 72.
Crucible Furnaces, 319.
Crucible Furnaces, Design of Oil-Fired, 117.
Cylinder in Loam, Moulding a High-Duty Hydraulic, 231.
Czecho-Slovakian Foundry Industry in 1931, 26.

D

Deoxidisers and Fluxes, 6, 57.
Deterioration of Structures in Sea-Water, 14.

E

Electric Furnace Installation, Large, 81.
Enamelling Cast Iron, Modern Methods of, 162.
Enamelling of Cast Iron, 243.
Engineer's View of the Foundry, 7.
Equipment Industry in 1931, Foundry, 36.

F

Fatigue of Metals, 210.
Ferrous and Non-Ferrous Metals in the Foundry, 354.
Flexible Couplings in Foundries, Use of, 103.
Fluxes, Deoxidisers and, 6, 57.
Foundation Block, Moulding and Casting 32-ton, 55, 83.
Foundry Congress, 4th International, 138.
Foundry Engineer's View of the, 7.
Foundry Industry, Iron and Steel (Census of Production, 1930), 70.
Foundry Industry Month by Month (1931), 17.
Foundry Opportunities in the West Indies, 328.
Foundry Selling Practice, 146, 171, 221, 296.
Foundry Trades' Equipment and Supplies Association: Sixth Annual Meeting, 291.
Foundryman, Practical, 191.
French Blast-Furnace Company Organise Competition, 82.
Fuel-Fired Melting Furnaces, Working of Rotary Pulverised, 338.
Furnace, "Witton" High-Frequency Induction, 104.

G

German Iron Foundries in 1931, 53.
Graphite in Cast Iron, Formation of, 223.
Grey-Iron Castings, Contraction, Distortion and Camber in, 395.
Grey-Iron Castings, Quantity Production of, 350.

H

Heat-Resisting Alloys, 180.
Heat-Resisting Cast Iron, 88.
Heterogeneity of a Sand-Cast Steel Ingot, 310.
High-Frequency Furnace and Its Use for the Manufacture of Steel Castings, 73.

I

Impact Tests for Cast Iron, 204.
Improved Lighting as an Aid to Industrial Efficiency, 250.
Inclusions in Steel, 209.
Ingot Mould Foundry, Modern, 245.
Ingot Mould Irons, Thermal Properties of, 272.
Ingot Moulds for Steel Ingots, Efficient Moulding Plant for Cast-Iron, 105.
Institute of British Foundrymen:—
Annual Banquet at Newcastle-upon-Tyne, 379.
Annual Conference, 282.
Birmingham Branch, Annual Dinner, 142, 292.
Cure Reception and Dance (Newcastle Convention), 391.
East Midland Branch, Annual Dinner, 186.
Edinburgh Propaganda Meeting, 4.
Election of New Members, 52.
General Council Meeting, 242.
Institute Elects New Members, 399.
Lancashire Branch, Annual Dinner, 134.
List of Members attending Conference, 381.
London Branch, Annual General Meeting, 313.
Middlesbrough Branch, Annual Meeting, 309.
Newcastle and District Branch: "A Few Hours on the Floor of a Jobbing Foundry," 283.
Scottish Branch, Annual Meeting, 222.
Scottish Branch, John Surtees Medals Presented, 208.
Scottish Branch, Visit to Messrs. Glenfield & Kennedy, Kilmarnock, 340.
Sheffield Branch, Annual Dinner, 96.
Twenty-ninth Annual Convention at Newcastle-upon-Tyne, 363.
West Yorkshire Branch, Annual General Meeting, 312.
West Yorkshire Branch, First Annual Dinner, 86.
Institute of British Foundrymen in 1931, Work of, 38.
Iron and Steel Industry, Reorganisation of, 373.
Iron and Steel Institute, The Annual Dinner, 291.
Iron and Steel Institute, The Annual Meeting of, 293.
Italian Steel Foundry Industry in 1931, 29.
Italian Steel Foundry Practice, 248.

J

Jobbing Foundry Moulding Jobs, 87.
Jobbing Foundry Practice, Difficulties in Modern, 35.

L

Lattice Spacings of Iron-Aluminium Alloys, 208.
Leaders:—
A Further Step, 377.
Alloy Cast Iron—*Quo Vadis?* 185.
Alloyed and Heat-Treated Cast Iron, 1.
Art in Industry, 317.
Basic Factors, 109.
British Standards Institution, 1.
Budget, Tariff and the Foundry, 255.
Cast Iron and the British Industries Fair, 169.
Census Again, 79.
Committee Reports, 393.
Creep Test, 95.
Cupola Casting and "Foreign" Scrap, 95.

6705 v.46

Customs of the Trade, 79.
Discussion on Testing Castings, 227.
Do Volatiles Vitiate? 241.
Failure of Junior Sections, 227.
First Fruits of Tariffs, 317.
For the Attention of the Buyer, 153.
Fuel Research, 199.
Further Tariff Points, 287.
Heat-Treated Cast Iron and Engineering, 377.
High-Duty Ferrous Alloys, 287.
How Long? 333.
Improvisations, 51.
Industry at Last, 65.
Ingot Moulds, 271.
Innovation, 79.
Interesting Clause, 125.
Is Trade Improving? 213.
Mechanisation and Elasticity, 199.
Mould-Drying Problems, 271.
National Physical Laboratory, 139.
Need for Action, 361.
Newcastle Convention, 301, 361.
Now—and Then, 333.
Paper "Wangle," 65.
Plasticity and Elasticity, 109.
Review of the Foundry Industry, 15.
Routine Chemist or Industrial Development Officer? 139
Sales Propaganda, 241.
Sand Testing, 125.
Session in Retrospect, 213.
Testing Cast Iron, 393.
Testing of Castings, 153.
The Rotary Furnace, 347.
Wages and Prices, 51.
Weldings and Their Reaction, 169.
Welfare, Its Use and Abuse, 347.
When is Cast Iron Steel? 185.
World Production of Pig-iron, 301.
Light-Castings Industry, Commercial Developments in, 18.
Light-Castings Problems, 201.
Lighting as an Aid to Industrial Efficiency, Improved, 250.
Line of Demarcation, Seeking a, 348, 360.
London Iron and Steel Exchange, Annual Dinner, 148.

M

Magnetic Moulder, 89.
Malleable-Castings Industry in 1931, 37.
Malleable Iron, Annealing Furnace for, 339.
Malleable, Open-hearth Furnace as a Melting Medium for, 195.
Manchuria, Iron and Steel in, 104.
Manganese Steel in Australia, The Production and Application of, 305.
Marine Engineering Castings, Manufacture of, 215.
Marine Engineering Foundrywork, Developments in, 33.
Messrs. Glenfield & Kennedy, Kilmarnock, 340.
Metallographic Testing Standards, 209.
Mould Density Determination, 302.
Moulder, Magnetic, 89.
Moulding a High-Duty Hydraulic Cylinder in Loam, 231.
Moulding and Casting, Introduction to Study of, 382, 400.
Moulding, Green Core, 343.
Moulding Hydraulic Cylinders, 242.
Moulding Jobs, Jobbing Foundry, 87.

N

National Federation of Iron and Steel Manufacturers, Annual Dinner, 128.
Nickel Additions, Cast Irons with Higher, 193, 217.
Nickeliferous Cast Iron, 235.
Nitrogen-Hardening of Cast Iron, Some Experiments on, 279.
Non-Ferrous Castings, Blowholes and Porosity in, 229.
Non-Ferrous Foundry Industry, Recent Developments in, 40.
Non-Ferrous Metals and Tariffs, 170.
Non-Ferrous Metals in 1931, 30.
Non-Ferrous Metals Research Association, 372, 373.
Non-Ferrous Scrap: Stalemate in, 328.

O

Oil Engine Foundry Practice: Some Aspects of, 385.
Oil-Fired Crucible Furnaces, Design of, 117.
Oil-Sand Practice, 118.
Oil-Sand Practice, Practical Notes on, 130.
Open-Hearth Furnace as a Melting Medium for Malleable, 195.

P

Pig-Iron: Additional Protection for, 371, 373.
Pig-Iron Trade in 1931, 19.
Pig-Irons: Factors Controlling the Crystallisation of Graphite in, 341.
Pipes and Progress, 90.
Plastic Deformation of Metals, 298.
Porosity in Non-Ferrous Castings, Blowholes and, 229.
Price Per Cwt., 106.
Problems, Solving Practical, 3.
Pulverised Fuel and Pulverisers in the Foundry, Use of, 157.

R

Railway Foundry Practice, Recent Developments in, 27.
Research in 1931, Foundry, 21.
Rotary Pulverised Fuel-Fired Melting Furnaces, The Working of, 335.
Rust Preventative, Heat-Resisting Paint and, 236.

S

Sand-Blasting Developments, 60.
Sand Control, 190.
Sand, Relation between Shape of Grain and Strength of, 220.
Sand-Spun Pipes, Manufacture of, 303.
Sand Testing in the Foundry, 97, 113, 129.
Sandslinging Practice in the Foundry, 111, 143.
Selling Practice, Foundry, 146, 171, 221.
Silico-Manganese Steels, Properties of, 308.
Silicosis, Compensation for, 341.
Slag Composition on the Structure of Grey Cast Iron, Effect of, 5.
Slump in Tin, 228.
Spelter, Setback in, 209.
Sponge, Production and Use in Steel Practice of Iron, 235.
Spun-Pipe Manufacture, Applying Foundry Technique to, 324, 332.
Steel Castings, High-Frequency Furnace and its Use for the Manufacture of, 73.
Steel Castings, Metal for, 274.
Steel, Determination of Gases, 196.
Steel-Foundry Industry in 1931, 20.
Steel-Foundry Practice, A Practical Discussion on, 295, 296.
Steel-Foundry Practice, Italian, 248.
Steels, Silico Manganese, Properties of, 308.

T

Taking a View, 110.
Tank Plates, 242.
Tensile Test-Bar for Cast Iron, Shape of, 327, 330.
Test-Bars, Influence of Shape in Tensile, 67.
Testing, Modern Practice in Cast-Iron, 173, 187.
Testing of Castings, 154, 205.
Testing of Iron Castings, 233.
Textile Engineering, Recent Developments in, 23.
Threads, Casting of, 172.
Turbine-Cylinder-Casing Pattern, Making a Large, 277.

W

Wear of Cast Iron, 216.
Welding, Application of Electric-Arc, 71.
Welding Material for Manganese Steel, New, 221.

AUTHORS' INDEX.

A

Abell, C. D., 341.
Allan, J. B., 303.
Allen, N. P., 229.
Allison, A., 46, 394.
Anderson, D. G., 289, 290.
Atchison, R., 111.

B

Bagshawe, A. W. G., 37.
Bailey, G. L., 6, 57.
Beardshaw, H. E., 385, 389.
Blum, W., 135.
Bowman, A., 318.
Bradley, A. J., 308.
Bradshaw, J. H. D., 162.
Brown, J. N., 399.
Buchanan, W. Y., 97, 113, 302.
Burns, G., 308.
Butler, G. B., 145, 177.

C

Calder, N. G., 283.
"Caledonian," 81.
Carpenter, Prof. Sir H. C. H., 341.
Cassidy, G. L., 319.
Clark, D., 305.
Colbeck, E. W., 288.
Cooper, W. R., 219.
Coutts, J., 305.

D

Dawson, S. E., 335.
Deschamps, J., 20, 349.
Dews, H. C., 40.
